Ideation Phase
Brainstorm & Idea Prioritization Template

Date	30 June 2026
Roll No	23A51A42A3
Project Name	Metro Ticket Generating System using ServiceNow
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Project Preparation

Before starting the development, the existing metro ticket booking process was studied to understand the difficulties faced by passengers and administrators. The major issues identified included long waiting queues, manual ticket management, and inefficient record keeping. ServiceNow components such as the Service Catalog, Flow Designer, custom tables, and Business Rules were researched to determine the most suitable approach for automating the ticket booking process. Based on this analysis, the required features were listed, and a development plan was prepared.

Problem Statement

How might we automate metro ticket booking using ServiceNow to reduce waiting time, improve ticket management, and provide a fast, secure, and user-friendly booking experience?

Brainstorming Ideas

The following ideas were generated during the brainstorming phase:

- Metro Ticket Booking
- Source Station Selection
- Destination Station Selection
- Automatic Fare Calculation
- Ticket Generation
- Booking History
- Notifications
- Admin Dashboard
- Service Catalog Integration
- Flow Designer Automation
- Reports
- Custom Tables

Grouping of Ideas

The identified ideas were organized into the following categories for better planning and implementation.

User Features

- Metro Ticket Booking
- Source Station Selection
- Destination Station Selection
- Booking History

Automation

- Flow Designer
- Notifications
- Ticket Generation
- Business Rules *(if implemented)*

Administration

- Admin Dashboard
- Reports
- Booking Management

Database

- Custom Tables
- Passenger Records
- Metro Ticket Records

Idea Prioritization

The identified ideas were prioritized based on their importance and implementation feasibility.

High Importance – Easy to Implement

- Metro Ticket Booking
- Source Station Selection
- Destination Station Selection
- Automatic Fare Calculation
- Service Catalog Integration

High Importance – Difficult to Implement

- Flow Designer Automation
- Ticket Generation
- Notifications
- Reports

Low Importance – Easy to Implement

- Booking History
- User Profile

Low Importance – Difficult to Implement

- QR Code Ticket *(Future Enhancement)*
- Online Payment *(Future Enhancement)*
- Live Metro Tracking *(Future Enhancement)*

Final Selected Idea

Metro Ticket Generating System using ServiceNow

Reason for Selecting the Idea

The Metro Ticket Generating System was selected because it provides an efficient solution for automating the metro ticket booking process. The application enables users to book metro tickets through the ServiceNow Service Catalog, automatically calculates ticket fares, stores booking information in custom tables, and automates ticket generation using Flow Designer. This solution reduces manual effort, minimizes passenger waiting time, improves data accuracy, and enhances the overall ticket booking experience while demonstrating the practical implementation of ServiceNow application development concepts.
