Customer Problem Statement Template:

Project Name:-

Metro Ticket Generating System using ServiceNow

Problem Statement (PS-1)

Field	Content
I am (Customer)	A metro passenger who travels regularly using metro services.
I'm trying to	Book a metro ticket quickly by selecting the source and destination stations through an online system.
But	The existing ticket booking process requires passengers to wait in long queues, and managing tickets manually is time-consuming.
Because	The current system lacks an automated ticket booking platform that can generate tickets and maintain booking records efficiently.
Which makes me feel	Frustrated because I spend extra time purchasing tickets and experience delays during my journey.

Problem Statement (PS-2)

Field	Content
I am (Customer)	A metro administrator responsible for managing metro ticket bookings.
I'm trying to	Maintain passenger booking records and generate metro tickets accurately.
But	Managing ticket bookings manually increases workload and makes it difficult to track booking information.
Because	The existing process is not automated and does not provide centralized ticket management.
Which makes me feel	Overburdened because manual ticket management is time-consuming and prone to errors.

Problem Statement (PS-3)

Field	Content
I am (Customer)	A daily commuter who depends on metro transportation.
I'm trying to	Book metro tickets conveniently before starting my journey.
But	Ticket booking becomes slow during peak hours due to manual processing.
Because	There is no efficient automated system to handle ticket requests and generate tickets instantly.
Which makes me feel	Dissatisfied because the booking process affects my travel schedule.
