Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	30 June 2026
Roll No	23A51A42A3
Project name	Metro Ticket Generating System using ServiceNow
Maximum Marks	4 Marks

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Authentication	Login through ServiceNow Portal
		User Logout
FR-2	Metro Ticket Booking	Select Source Station
		Select Destination Station
		Enter Number of Passengers *(if implemented)*
		Submit Ticket Request
FR-3	Fare Calculation	Calculate Fare Based on Source and Destination
		Display Total Fare
FR-4	Ticket Generation	Generate Metro Ticket
		Generate Unique Ticket Number *(if implemented)*
FR-5	Booking Management	Store Booking Details in Custom Table
		View Booking History
FR-6	Notifications	Send Booking Confirmation Notification
		Update Booking Status
FR-7	Administrator Management	View All Ticket Requests
		Manage Passenger Bookings
		Generate Reports

Non-Functional Requirements

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide a simple and user-friendly interface for booking metro tickets.
NFR-2	Security	Only authorized users should be able to access the application and booking records.
NFR-3	Reliability	The system should generate and store ticket bookings accurately without data loss.
NFR-4	Performance	The application should process ticket requests and display booking information quickly.
NFR-5	Availability	The system should be available whenever users need to book metro tickets.

NFR-6	Scalability	The application should support an increasing number of users and ticket bookings without affecting performance.
NFR-7	Maintainability	The application should be easy to update, manage, and enhance with new features.
NFR-8	Data Integrity	Booking information should remain accurate and consistent throughout the system.
